PROFILE SUMMARY

- Technical Lead / Manager / Senior Software Engineer with 13+ years of experience building enterprise applications and distributed systems from scratch.
- Experienced in leading engineering teams, driving end-to-end product delivery, and collaborating with clients and product teams across the UK, US, Canada, and Europe; analysing and assessing technical requirements and translating business needs into technical solutions.
- Strong proficiency in developing scalable applications with TypeScript, Node.js, React.js, Java, AWS and serverless architecture.
- Ability to quickly learn and adopt new technologies, rapidly develop proof-of-concepts, and evaluate technology selections.

SKILLS

- **Backend:** Node.js, Express.js, Java, Spring Boot, Hibernate
- **Frontend:** React.js, TypeScript, JavaScript, HTML5, CSS
- **AWS Cloud:** Cognito, Lambda, API Gateway, CloudFront, RDS, S3, SNS, SQS, ECS, EKS, ElastiCache (Redis)
- **Databases:** MySQL, DynamoDB, MongoDB
- **Testing:** Jest, Mocha, Chai, JUnit
- **DevOps & CI/CD:** GitHub Actions
- **AI Coding Agent:** Cursor, Copilot, Antigravity
- **Methodology & Leadership:** Agile, Scrum, Sprint Planning, Grooming, Business Analysis, Team Leadership

WORK EXPERIENCE

- **Execution Lead - TwoPiRadian Infotech (2PiRad), Kolkata** Apr 2021 - Present
 - Product: Arca, Client: WiredScore, UK
 - ◆ Role: **Technology Lead & Technical Business Analyst**
 - ◆ Description: Certification workflow for real estate industry to evaluate Internet Connectivity and IoT Smartness.
 - ◆ Technologies: TypeScript, React.js, Express.js, Serverless Framework, Java, Spring Boot, Hibernate, AWS (API Gateway, Lambda, Cognito, RDS, CloudFront), AWS SDK, Third-party REST API Integrations,
 - ◆ Responsibilities:
 - Led and mentored teams of 5 developers and owned end-to-end technical delivery from requirements and solution design through development, code reviews, sprint planning, and production release with engineering best practices.
 - Architected and developed serverless backend solutions from the ground up and designed REST API integrations with enterprise platforms including Salesforce, Litmos, and Airtable.
 - Partnered with product and business stakeholders as a Technical Business Analyst, driving requirements analysis, feasibility assessment, FRD/BRD alignment, JIRA story creation, estimation, prioritization, and technical planning.
 - Product: NMap, NSwap, Client: Navozyme, ES
 - ◆ Role: **Technology Lead & Scrum Master**
 - ◆ Description: NMap, a port call management platform for real-time data exchange between vessels, agents and maritime & port authorities; NSwap, a progressive web app for waste declaration and disposal receipt management platform.
 - ◆ Technologies: TypeScript, React.js, Express.js, Node.js, Jest, HTML, CSS, AWS (SNS, SQS)
 - ◆ Responsibilities:
 - Led and mentored a team of 4 developers, driving end-to-end feature delivery from design to production while managing task allocation and delivery execution.
 - Served as Scrum Master, facilitating Agile ceremonies including daily stand-ups, backlog grooming, sprint planning, retrospectives, and task allocation to ensure predictable delivery and effective team execution.

- Senior Software Engineer - TwoPiRadian Infotech (2PiRad), Kolkata**

Apr 2017 - Mar 2021

 - Product: Paxata | Client: DataRobot, US
 - ◆ Role: **Senior Developer**
 - ◆ Description: A data preparation platform used for BI tools and AI/ML tools.
 - ◆ Technologies: Java, Scala, AWS SDK, CData SDK, JUnit
 - ◆ Responsibilities:
 - Feasibility study and technical investigation for authentication and integration with data sources of 3 categories: object storage, RDBMS and NoSQL databases.
 - Designed and developed connectors enabling bidirectional data transfer across object storage, relational and NoSQL data sources, including AWS S3, DynamoDB, Redshift, Google Cloud Storage, Google Drive, Snowflake and MongoDB.
- Software Engineer - TwoPiRadian Infotech (2PiRad), Kolkata**

Nov 2014 - Mar 2017

 - Product: XactLIFE | Client: Life Prediction Tech, CA
 - ◆ Role: **Full Stack Developer**
 - ◆ Description: A prognostic (life assessment) system for turbines used in aircraft.
 - ◆ Technologies: Java, Spring Boot, Hibernate, JUnit, Apache Derby, HTML, CSS, jQuery, Bootstrap.
 - ◆ Responsibilities:
 - Requirements gathering and wireframing using Balsamiq
 - Development, testing, UAT & production support
 - Gained two months of onsite experience in Ottawa, Canada, focusing on requirement gathering, wireframing, and technical support.
- Software Engineer Trainee – Nucleus Software, Noida**

Aug 2013 - Nov 2014

 - Product: FinnOne CAS | In-house
 - ◆ Role: **Developer**
 - ◆ Description: A customer acquisition platform for a loan processing system.
 - ◆ Technologies: Java, Struts, JDBC, HTML, CSS, JavaScript
 - ◆ Responsibilities:
 - Development and production support

CERTIFICATIONS

AWS Certified Cloud Practitioner – AWS	2021
Oracle Certified Java Professional – Oracle	2015

EDUCATION

B.Tech - Information Technology – Institute of Engineering and Management	2013
Class XII – St. Xavier's Institution	2009
Class X – St. Xavier's Institution	2007
